# Wonder.me

Meeting platform

Overview:

Wonder.me is a fun, interactive platform to hold meetings, both formal and informal, where participants can meet using video/audio/chat. What makes Wonder.me unique is the ability for participants to see at-a-glance who is in the virtual space and travel from one location to another.

Why and when to use:

Use this platform for meetings where you want participants to be able to move on their own. There is no recording feature yet, and the platform does not support iOS devices.

Tips:

- Create a background that has some basic instructions regarding zooming out to see the entire space and click-and-hold movement
